# Smart Return to Work Solutions

# Returning to Work?

With lockdown restrictions in the UK easing, businesses must act quickly to ensure staff can return to work safely, gain consumer confidence and encourage footfall, as well as remain compliant in accordance with government guidelines.

To help, we have introduced **Smart Return to Work solutions** from Welcomm Communications together with O2, designed to enable businesses to operate safely.

- 1 Thermal Cameras with workflow capability
- 2 Digital Contactless reception
- 3 Social Distancing Room Measurement
- 4 Queuing solutions
- 5 Footfall Measurement and Management
- 6 Handwash sensors & Cleaning Logs solutions (FM)
- 7 Digital signage

# Thermal Cameras with Workflow Capability

As Covid-19 lockdown eases, organisations must ensure the safety and wellbeing of their staff and clients by minimising the risk of exposure to the virus.

Our thermal camera solution provides the ability to check individuals entering a business premises as to whether they are Covid-19 symptomatic. By creating subsequent actions, you keep your organisation safer.

Our end-to-end solution provides both fixed and handheld thermal cameras to check for a temperature in a non-invasive way with the accuracy of  $\pm 0.5^{\circ}\text{C}$ . Additional hardware, installation, training and support are also included.

## Scan and Protect

Help prevent the spread of COVID-19

The addition of our workflow solution supports a business by logging details with their HR department and advising action in accordance with government guidelines, giving your staff a clear process to follow. Further analytics packages and in-depth reporting for due-diligence and legislative compliance can also be provided.

# Digital Contactless Receptions and Entrances

Enable fast, secure, controlled access into your workplace, whilst limiting the risk of contamination.

Your visitors will receive unique QR codes for smooth check-ins and access to designated areas of your premises without the need for human intervention.

## Contactless

Uses a QR Code at location to verify proximity

## Hygienic

Reduces physical contact - no pens or kiosks

## Instant Notification

Streamlines reception, providing arrival notifications

## Device Agnostic

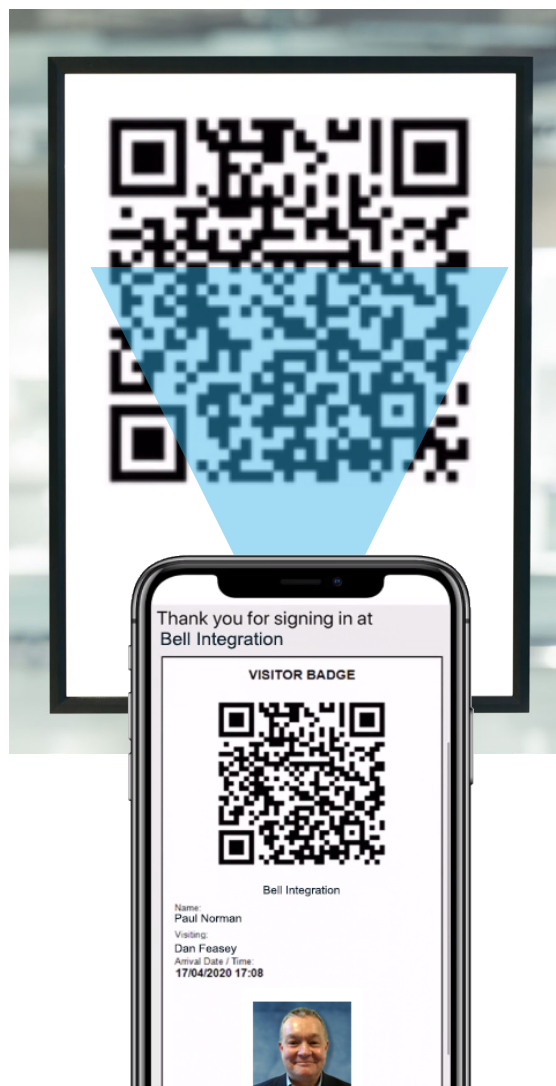

No specific hardware or equipment required

## GDPR Compliant

Details are secure

## Simple and Efficient

Integrates with Calendar systems including Office 365 and is fully digital, removing the need to physically queue

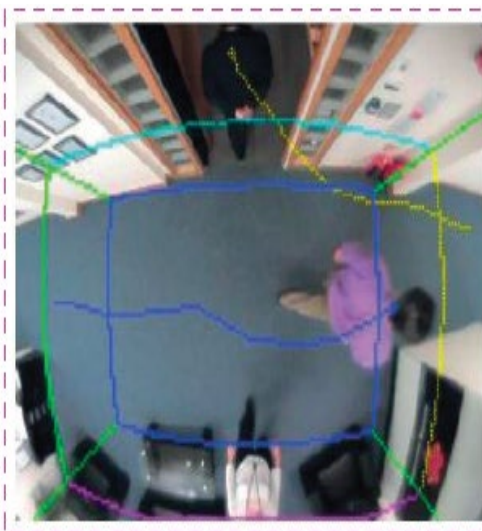

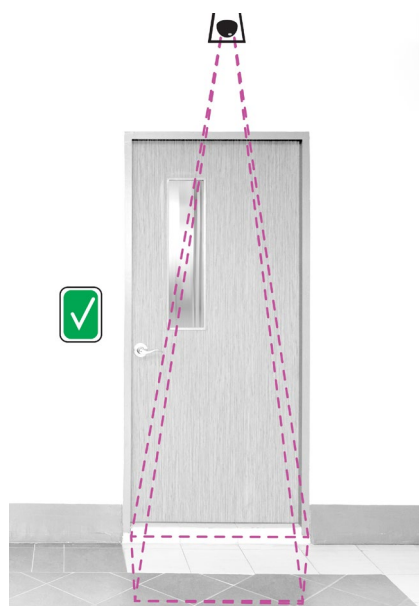

# Social Distancing Room Management

Our social distancing management system monitors the people count and occupancy status of communal areas and displays access status accordingly.

## How it Works

Once the count monitors occupancy at an acceptable level (in accordance with social distancing rules) then the access status of an area changes automatically.

- ✓ The people counter creates a 3D virtual environment to allow for accurate people counting.
- ✓ Traffic flow can be analysed from the point of entry.
- ✓ Once the people flow count (in/out) reaches a certain limit a 'requires cleaning' status can also be set to alert building maintenance staff that a particular area requires attention.

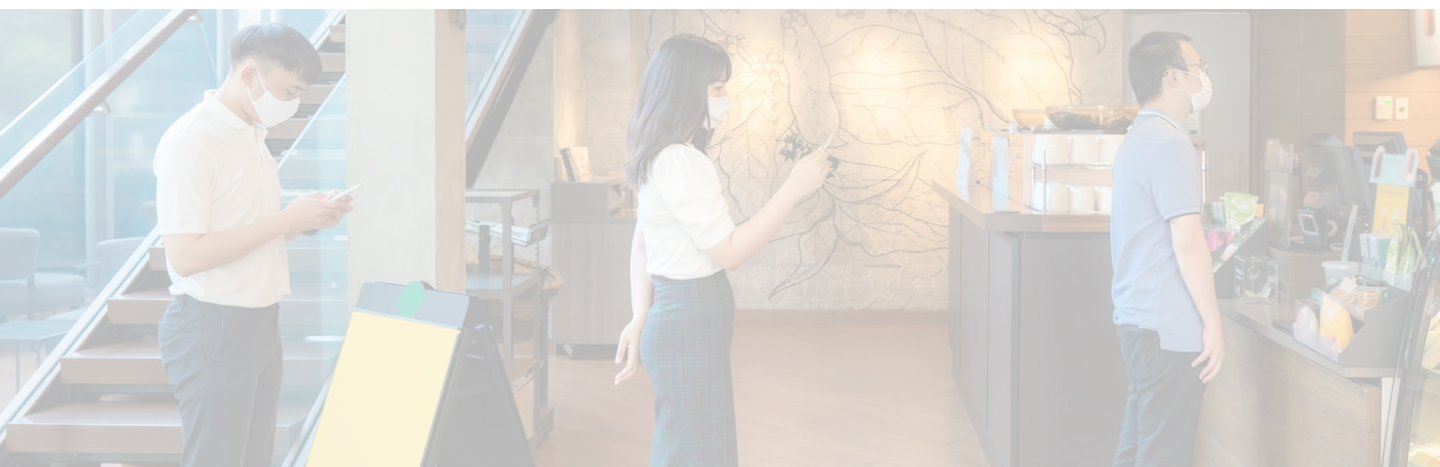

# Queuing Solutions

Ensure the correct social distancing measures and replace physical queues and busy waiting rooms with faster Virtual queues.

## Key Solution Benefits

- ✓ Getting people to the right resource without waiting
- ✓ Professionally greet customers with digitally stored details
- ✓ Schedule customers and manage waiting lists
- ✓ Loyalty recognition for customers
- ✓ Minimise human interaction
- ✓ Visitor insights
- ✓ Real-time alerts and analytics

# Footfall Measurement and Management Systems

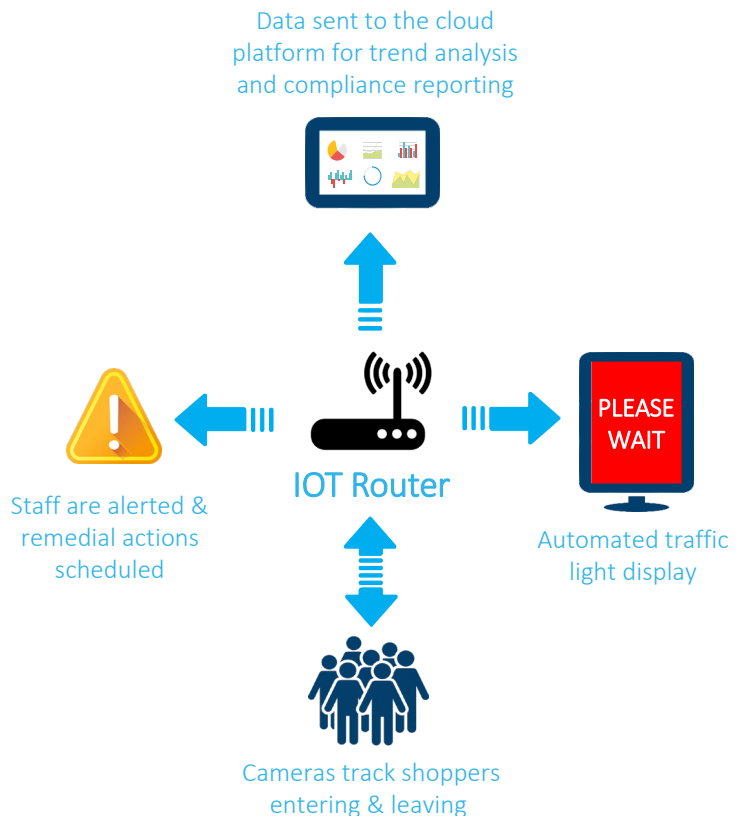

With fire regulations, capacity limitations and now the Government providing additional guidelines to many businesses, including retailers to limit the number of shoppers in stores at any one time to help combat the spread of Covid-19, a footfall measurement system is imperative.

Our footfall measurement solution accurately and automatically counts the number of people entering or leaving a space. If the maximum capacity is reached, door staff can be alerted and shoppers, visitors or staff waiting to enter will be asked to queue via digital signage.

We provide an end-to-end system which includes sensors, hardware, software, support, analytics and digital signage.

## Key Solution Benefits

- ✓ Help ensure a safe shopping environment
- ✓ Meet government guidelines
- ✓ Greet customers
- ✓ Minimise human interaction
- ✓ Real-time alerts
- ✓ Provide insight and analytics

# Handwash Sensors and Cleaning Log Solutions

The latest innovations that minimise cost and improve washroom management, creating a safe clean environment with reporting control.

## Key Solution Benefits

- ✓ Registering and validating Covid-19 deep clean protocols
- ✓ Monitoring soap dispenser availability
- ✓ Capturing usage of facilities (footfall, capacity, occupancy etc.)
- ✓ Reactive cleaning and security activities
- ✓ Real time data visualisation
- ✓ Real time crowd density monitoring

## Report and Act on Key Metrics and Ensure a Safe Environment

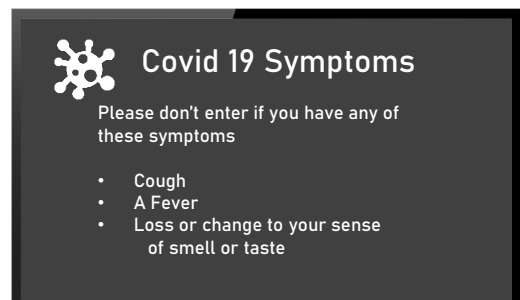

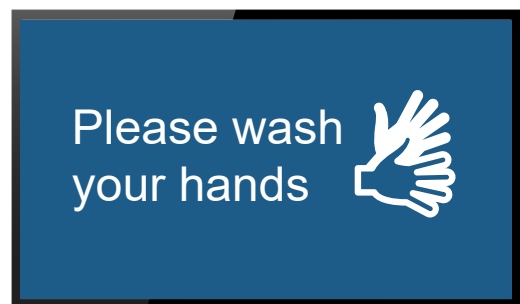

# Digital Signage

Creating the ability to bring people back to the workplace, whilst limiting contamination and enabling a fast and secure workplace.

## Key Solution Benefits

- ✓ Distancing reminders
- ✓ Meeting room management and utilisation
- ✓ Office utilisation and Covid 19 guideline notifications and management
- ✓ Notification of cleaning status for kitchen/washroom access and people counting to control
- ✓ Delivery of positive messaging
- ✓ General business updates
- ✓ Temporary and permanent solutions available
