

The Samsung Galaxy Z Flip5 is Samsungs most impressive flip phone yet, letting your customers do more than ever before, whether it's open or closed. With an incredible 278% larger cover screen[1], they get added functionality with incredible style. The screen is customisable, meaning they can odd their own sense of taste and flair. Plus, there's more space to read and reply to messages, check their diary, emails, weather and plenty more. The zero-gap hinge means it folds up smaller than ever for increased portability. And when they do flip it open, the generous 6.7" display with Flex Mode means they can view content at the top whilst using the bottom half of the screen to navigate, adjust settings and multi-task across apps with confidence.

The Galaxy Z Flip5 is the phone that lets your customers express themselves and their business in their own way.
