

TRACKER Vehicle Asset Management Systems can help you:

Increase operational efficiency

- Conform to working hour directives
- Reduce journey times
- Reroute drivers more resourcefully
- Achieve more calls or visits per day
- Minimize unnecessary downtime or idling time
- Ensure better route planning
- Measure hundreds of commercial peripherals, such as fuel and oil levels

Improve driving behavior and safety

- Monitor excessive speeding
- Live poll a vehicle to check location
- Identify an unplanned deviation from a set route
- Monitor rapid over-acceleration and harsh deceleration
- Sense over-revving
- Supervise the condition of trailer braking systems remotely allowing faults to be anticipated, detected and prevented

Experience cost benefits

- Identify unauthorized mileage and overtime expenses
- Reduce insurance costs
- Improve vehicle running costs
- Monitor budgets realistically
- Reduce fuel consumption costs
- Reduce mobile phone costs

Improve customer service

- Identify and prove time spent on a specific customer site
- Conformance to a customer contract such as adherence to an agreed timed delivery schedule
- Customers can be advised as to the whereabouts of their deliveries
- Comprehensive monitoring - e.g. Temperatures
