

## Leveredge Instant Push-To-Talk

Push-To-Talk between all devices and networks.

Whether on a smartphone, radio, computer, landline or any other communications device, your personnel can connect instantly and securely via P-T-T.

# instant

As we look to the future, our goal is to keep critical communication channels open.

In today's modern environment, it is vital that communications are dependable and instantaneous. Whether for the safety of a worker, in emergency situations or for business operations; Leversedge Instant Broadband Push-to-Talk is a comprehensive solution to help your business grow.

## Why Leversedge Instant Broadband Push-to-Talk?

Our Instant Push-to-Talk solution can integrate with your existing equipment and service offering, providing greater functionality, better reach and fast secure communications. Many customers find that once deployed, Instant Push-to-Talk becomes an innovative solution they can no longer operate without.

## Securely Communicate

Instant Push-to-Talk is hosted on secure private servers and provides reliable communication with sub-second performance to keep your teams safe when they need it most.

## Interconnect

With Instant Push-to-Talk, we are bringing tomorrow's technology to today's market, providing all the benefits of private mobile radio and broadband on one platform.

## Innovate

Instant Push-to-Talk is a modern and cost effective solution that enables communication between two-way radios and cellular devices.

## What can Instant Push-to-Talk give you?

- ✓ Instant communication between two-way radios and cellular devices across different manufacturers
- ✓ Expansion of existing systems providing global reach
- ✓ Secure communications hosted on private servers
- ✓ Communicate via group and individual calls
- ✓ Low set up costs with minimal maintenance
- ✓ Easy user adoption
- ✓ Range of compatible rugged devices offering lone worker protection
- ✓ All-encompassing solution reducing the need for additional equipment

## Construction

Instant Push-to-Talk can provide any small, medium, or large-scale projects with the necessary communications facilities for instant communications with no coverage limitations or setup issues. Instant Push-to-Talk can significantly enhance construction services and coordination, whether it is site preparation, equipment installation, utility hook-up coordination or system commissioning and testing.

## Courier

Instant Push-to-Talk is a high availability communications solution that meets the end-to-end needs of courier businesses. Logistics can become more effective with push-to-talk communications solutions and Enterprise and Management Systems including QR-code scanning functions. Instant Push-to-Talk can be integrated with existing delivery networks to provide more efficient control.

## Transportation

Instant Push-to-Talk provides instant and reliable communications for smooth operation of transportation routes and hubs. Voice, data and location capabilities enable integration with existing systems such as traffic monitoring and control (or airport /seaport management), allowing users to improve delivery of transportation services across the region.

## Freight and Logistics

Appropriate security measures protect the people employed in the freight transport industry and ensure the safe provision of these important services. Instant Push-to-Talk can offer efficient and cost-effective solutions to improve the security of push-to-talk communications.

## Security

Effective communication is paramount within the security sector, and Leversedge Instant Push-to-Talk is fast becoming the model solution.

By delivering business critical communications, including key features such as task management, lone worker protection and location recording, Instant Push-to-Talk can integrate with existing communications systems to help promote safety and ensure the wellbeing of all staff.

Instant Push-to-Talk makes it simple and safe for all parties to track and be tracked every step of the way. With remote control camera access and ambient listening, Instant Push-to-Talk enhances the ability to complete any security task to the highest professional level.

*“Acting as both a radio and a phone, the tracking software and Guard Tour system provides us with accurate reporting, allowing clients to clearly see that we have patrolled as promised. It also gives our Officers peace of mind as communication is a lot easier and quicker, making our staff feel safer with video recording, tracker and SOS functionality.”*

**Gary Sheffield, Director  
GTS Security Services**

*“We decided to partner with Leversedge because we have worked with them for years, and we trust their level of service. They took the time to listen to our exact needs before proposing their Instant Push-to-Talk Solution”*

**Tom Conlan, Director  
GTS Security Services**
